

Language Writing Exercise

Change the unhelpful language to a more recovery focused, strength based language

1. Client is non-compliant with her treatment plan and is refusing to take her medication.

2. Patient is grandiose and has delusional ideas about him having majestic powers to cure people.

3. Client is manipulating staff in order to gain more attention.

4. Consumer lacks insight into his illness because he doesn't agree that he is a schizophrenic.

5. Patient isn't engaging in treatment and resisted carrying out the behavioral task I gave her.

6. Client is low functioning and unable to care for himself.
